LinkedIn: <https://www.linkedin.com/in/pushpa-kumari-803226259>

Professional Summary

Full-stack developer skilled in React.js, Django REST Framework, and API integration, with experience building AI-powered web applications including SmartWaste and Plant Disease Detection systems. Interested in remote software development internships focused on scalable web products and backend engineering. Strong in problem-solving and full-stack application development.

Education

Lakshmi Narain College of Technology

2023-2026

Bachelor of Technology - Artificial Intelligence & Data Science – CGPA – 8.12

Bhopal, MP

Technical Skills

- Programming Languages: Python, Java, SQL
- Frontend: React.js, HTML, CSS, JavaScript, Tailwind CSS, Bootstrap
- Backend: Django, Django REST Framework
- Database: MySQL
- APIs & Web: REST APIs, API Integration, JSON
- Coursework: Data Structures & Algorithms, DBMS, OOP, Operating System
- Tools & Platforms: Git, GitHub, Postman, VS Code
- Cloud: AWS (Cloud Practitioner – foundational knowledge)

Experience

Software Engineering Virtual Experience – Commonwealth Bank (Forage)

Completed hands-on software engineering tasks involving responsive web development using HTML/CSS and analysis of financial cybersecurity principles for secure system design. Evaluated web hosting security measures and proposed scalable, secure hosting solutions to mitigate cyber threats and support future application growth.

Projects

Smart waste - Waste Management & Garbage Collection Tracker | GitHub: [link](#)

Tech Stack: React.js, Tailwind CSS, Leaflet.js, Django REST Framework, PostgreSQL, REST APIs

- Designed and deployed a full-stack platform enabling real-time issue reporting, status tracking, and AI-assisted route optimization with paginated, filterable dashboards for operational visibility.
- Engineered a live demo simulation engine and predictive service modules to demonstrate workflow automation, system reliability, and data-driven decision support in a production-like environment.

Plant Leaf Disease Detection System | GitHub: [link](#)

Tech Stack: React.js, Django REST Framework, Scikit-learn, OpenCV, NumPy

- Enabled early plant disease detection using classical ML and computer vision, delivering confidence-based predictions, risk severity and actionable recommendations through a responsive web interface.
- Delivered cloud-ready, full-stack applications with RESTful APIs, and a backend knowledge base to convert image-based insights into practical, user-guided agriculture decisions.

Achievements

Problem Solving & Coding Profiles | LeetCode: [Pushpa21-](#) | GeeksForGeeks: [@pushpa013fya](#)

Solved 170+ Data Structures & Algorithms problems on LeetCode and GeeksforGeeks using Java, with strong focus on arrays, strings, hashing, linked lists, trees, recursion, and dynamic programming basics.

Certification

- Certification in AWS Cloud Practitioner Essentials – AWS
- Certification in Database Management System - Infosys Springboard
