

Pushpa Kumari

+91-76676167 — Bhopal, Madhya Pradesh — [Mail](#) — [LinkedIn](#) — [GitHub](#) — [Portfolio](#)

Professional Summary

B.Tech graduate in Artificial Intelligence & Data Science with hands-on experience in React.js, Django, JavaScript, HTML, CSS, MySQL, and REST APIs. Skilled in developing responsive full-stack applications and scalable backend solutions. Seeking a Software Developer / Full Stack Developer role to apply and expand my technical expertise.

Technical Skills

Programming Languages: Python, JavaScript, Java, SQL

Backend: Django, Django REST Framework, REST APIs, JWT Authentication

AI / ML: Scikit-learn, OpenCV, NumPy, Classical Machine Learning, SVM, Image Processing

Frontend: React.js, HTML5, CSS3, Tailwind CSS

Databases & Tools: MySQL, PostgreSQL, Git, GitHub, Docker, Redis, Celery, Postman, VS Code

Core Concepts: Object-Oriented Programming (OOP), Data Structure & Algorithms, DBMS

Projects

Workflow *React.js, Django REST Framework, PostgreSQL, Redis, Celery, Docker — 2026*

[Project Link](#) — [GitHub](#)

- Built a production-oriented full-stack project and workflow management platform using React, Django REST Framework, PostgreSQL, Redis, and Docker, supporting teams, projects, issues, workflows, comments, attachments, and notifications.
- Implemented JWT authentication, refresh-token rotation, token blacklisting, protected REST APIs, and RBAC, securing application resources and enforcing role-based permissions.
- Engineered relational data models and asynchronous processing using PostgreSQL, Celery, and Redis, with notification workflows, request logging, centralized exception handling, and application health-check endpoints.
- Containerized and deployed the application using Docker Compose, Gunicorn, and Nginx, with the React frontend deployed on Vercel and Django backend, PostgreSQL, and Redis deployed on Render.

Leaf Disease Detector *React.js, Django Rest Framework, REST APIs, Scikit-learn, OpenCV — 2025*

[Project Link](#) — [GitHub](#)

- Developed a full-stack plant disease detection system using React, Django REST Framework, OpenCV, and SVM-based classical ML for automated leaf image classification.
- Implemented confidence-based prediction and unknown-image rejection, along with a backend decision-support engine for symptoms, prevention guidance, severity assessment, and actionable recommendation.
- Deployed a responsive, cloud-based application with RESTful APIs, interactive dashboard, controlled image previews, and animated result panels for an end-to-end user experience.

Education

Lakshmi Narain College of Technology (LNCT), Bhopal, MP

Aug 2023—June 2026

B.Tech., Artificial Intelligence & Data Science

CGPA: 8.19

Govt. Women's Polytechnic, Ranchi, JHK

Nov 2020—June 2023

Diploma, Electronics Communication Engineering

Percentage: 74.19%

Achievements

Problem Solving & Coding Profiles | LeetCode: [Pushpa21-](#) — GFG: [pushpa013fya](#)

Solved 220+ Data Structures & Algorithms problems on LeetCode and GeeksforGeeks using Java, strengthening problem-solving, debugging, and optimization skills.

Certification

Certification in AWS Cloud Practitioner Essentials – AWS — [Link](#)

Dec — 2025
