Technical Skills

Programming Languages: JavaScript, Python, Java, SQL

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, Django, Django REST Framework, REST APIs, JWT Authentication

Database & Tools: MySQL, Git, GitHub, Postman, VS Code, Docker

Core Concepts: OOPs, Data Structure & Algorithms, DBMS,

Projects

StockFlow *React.js, Redux Toolkit, Node.js, Express.js, REST APIs, MySQL, Docker — 2026*

[Project Link](#) — [GitHub](#)

- Developed a production-ready inventory and order management platform using React.js, Node.js, Express.js, and MySQL with a modular layered backend architecture.
- Implemented JWT-based authentication and role-based authorization (Admin, Inventory Manager, Staff) to secure REST APIs and restrict access based on user roles.
- Built complete CRUD modules for Products, Categories, Customers, Suppliers, Orders, and Inventory Transactions, enabling efficient inventory and order lifecycle management.
- Designed an interactive analytics dashboard displaying sales trends, revenue, order statistics, low-stock alerts, top-selling products, and recent transactions using REST APIs.
- Containerized the application using Docker and Docker Compose, and deployed the backend on Railway and frontend on Vercel with a cloud-hosted MySQL database.

SmartWaste *React.js, Tailwind CSS, Django REST Framework, REST APIs — 2025*

[Project Link](#) — [GitHub](#)

- Developed a full-stack waste management platform using React.js and Django REST Framework for real-time issue reporting and garbage collection tracking with filtering and status management.
- Integrated secure REST APIs for waste collection management, complaint handling, and report visualization.
- Implemented secure REST APIs with JWT based authentication for role-based access control for administrators, operators, and citizens.

Leaf Disease Detector *React.js, DRF, Scikit-learn, OpenCV — 2025*

[Project Link](#) — [GitHub](#)

- Developed an AI-powered web application for plant disease detection using image-based analysis.
- Built REST APIs for image processing and prediction services and created responsive frontend interfaces for image uploads and result visualization.
- Integrated machine learning models with backend services to provide actionable crop recommendations and debugged and optimized backend model integration.

Education

Lakshmi Narain College of Technology (LNCT), Bhopal, MP *Aug 2023—June 2026*

B.Tech., Artificial Intelligence & Data Science *CGPA: 8.19*

Govt. Women's Polytechnic, Ranchi, JHK *Nov 2020—June 2023*

Diploma, Electronics Communication Engineering *Percentage: 74.19%*

Achievements

Problem Solving & Coding Profiles | LeetCode: [Pushpa21_-](#) — GFG: [pushpa013fya](#)

Solved 200+ Data Structures & Algorithms problems on LeetCode and GeeksforGeeks using Java.

Certification

Certification in AWS Cloud Practitioner Essentials – AWS

Dec—2025
